

# Each eligible family pooled separately across all 10 imputations

Closeness intercept -> depression intercept

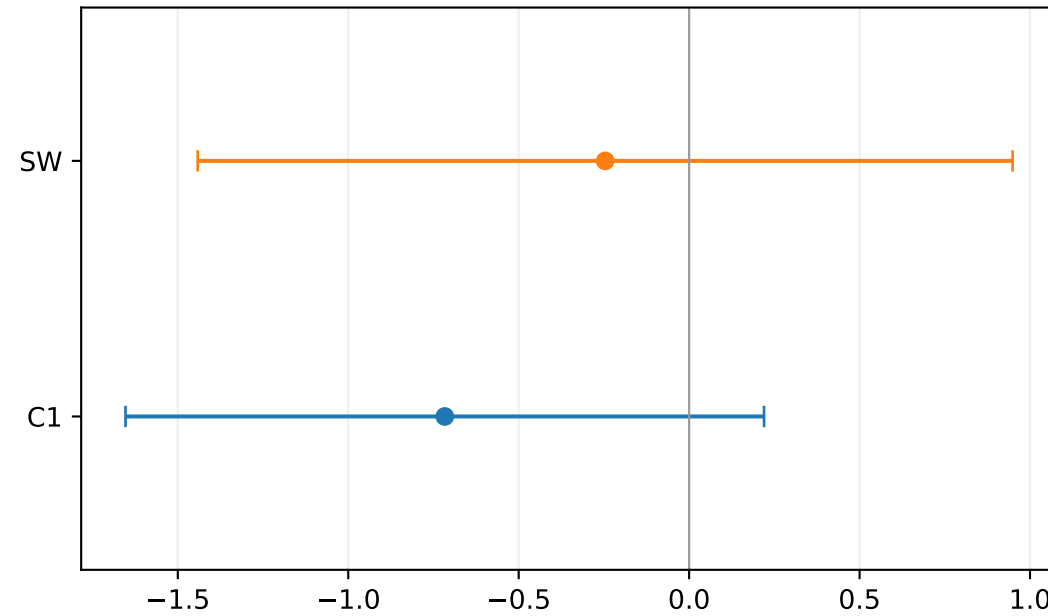

Closeness intercept -> depression change

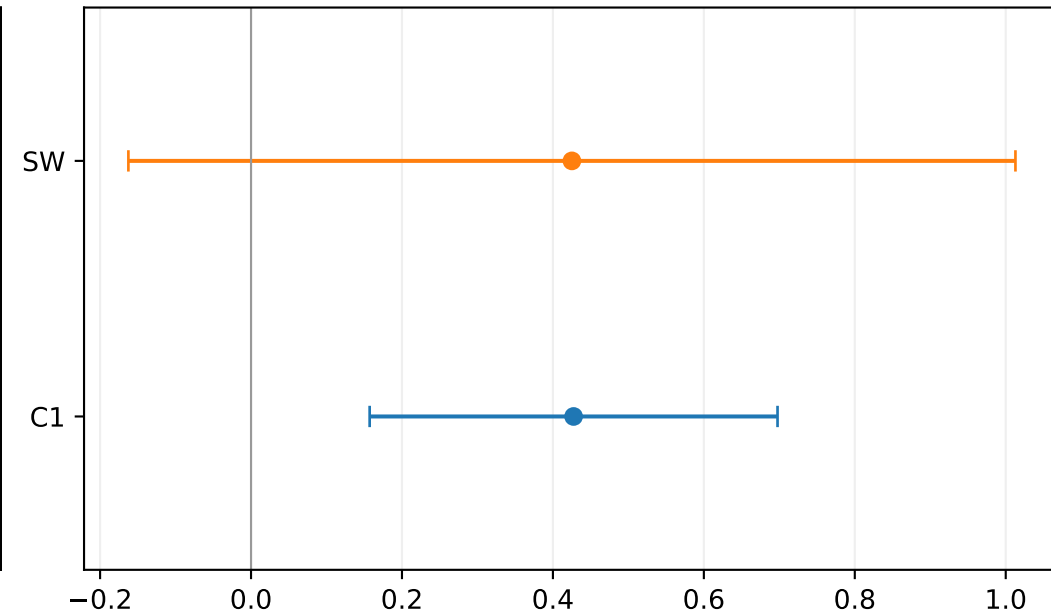

Estimate and conditional MI 95% interval

Estimate and conditional MI 95% interval

Closeness change -> depression change

Depression intercept -> depression change

Estimate and conditional MI 95% interval

Estimate and conditional MI 95% interval

C1: fixed SY residual=0. SW: same-wave residual covariances. XLIN: calendar-linear X and Y.  
Growth-factor meaning differs across structures; intervals exclude model-selection uncertainty.
